

The City of Baraboo Water Utility rates are established by the Public Service Commission of Wisconsin (PSCW) with the current **complete** rate file being effective March 20, 2012. Charges are approved for general metered water service based on meter size and volume in addition to charges for public & private fire protection service.

Effective January 1, 2016, the Water Utility was granted an inflationary (3%) rate increase by the PSCW on General Metered Service including volume charges AND Public Fire Protection Service only.

Each year, the Public Safety Committee makes a recommendation to the City of Baraboo's Common Council to adopt the Wastewater Utility rates effective for the first quarter billing of the affected year.
