****Other species may be permitted at the city Forester's discretion.**

Choose trees for their size at maturity. Do not pick large trees if they will be planted under power lines. All trees shall be planted at least 40' apart and no closer than 50' from an intersection. No tree shall be placed within 10' of any street sign, driveway, fire hydrant or water shut off valve. All new tree plantings will be a minimum of 1.25" caliper. All sites and species must be approved by the city Forester.
